SUMMARY

DevOps & Security Engineer with hands-on experience operating Azure and Kubernetes infrastructure, building CI/CD systems, and supporting cloud-native workloads. Strong systems and software engineering foundation in Linux, networking, backend development, and distributed systems, with a growing specialization in security engineering, secure infrastructure, and offensive security.

EXPERIENCE

Cloud DevOps Engineer — Performance Technologies S.A. Oct 2024 – Present
Athens, Greece

- Operated Azure cloud infrastructure across networking, compute, storage, and security — configuring VNets, NSGs, Key Vault, managed identities, and role-based access controls.
- Managed AKS cluster lifecycle including node pool scaling, version upgrades, workload deployments, rolling updates, and production troubleshooting of containerised microservices.
- Built and maintained CI/CD pipelines with GitHub Actions and Azure DevOps Pipelines, automating build, test, and deployment workflows across multiple environments.
- Deployed and configured Elastic Stack (ELK) for centralised log ingestion, built custom dashboards, defined alerting rules, and tuned log retention strategies across services.

DevOps Engineer — CoreNetworks Oct 2023 – Aug 2024
Greece

- Developed and maintained Python/Django backend services, implementing REST APIs and data models for production workloads.
- Built CI/CD workflows integrating GitHub Actions and the GitHub API, automating build, test, and deployment pipelines from commit to production.
- Automated operational tasks using Bash and Python scripts, reducing manual overhead across development and deployment workflows.

EDUCATION

MSc in Information Systems Development and Security Sep 2025 – Present
Athens University of Economics and Business (AUEB)

Key topics: Penetration Testing Methodology · Network Security & Secure Design · Cryptography & Applied Crypto · Vulnerability Assessment · Security-Aware Software Architecture

Major in Computer Science Oct 2020 – Oct 2024
National Kapodistrian University of Athens (NKUA) — Grade: 8.3 / 10

Systems programming (C), Algorithms & Data Structures, Operating Systems, Database Design (MySQL, PostgreSQL), AI/ML, Networks & Distributed Systems

TECHNICAL SKILLS

Cloud & Platform	Azure (VMs, Networking, Key Vault, Storage, IAM) · AKS / Kubernetes · Docker · Terraform · Bicep
CI/CD & Automation	Azure DevOps Pipelines · GitHub Actions · Git · Bash & Shell Scripting · Python
Observability	Elastic Stack (ELK) · Log ingestion & retention · Custom dashboards & alerting

Security	Web App Testing (Burp Suite, OWASP Top 10) · Network Scanning (Nmap, Netcat) · Vulnerability Assessment · Linux Privilege Escalation · Cryptography & Applied Crypto · Secure Network Design
Systems & Programming	Linux (Ubuntu, Debian, CentOS) · C / C++ · Python · SQL (MySQL, PostgreSQL) · Networking & Distributed Systems

CERTIFICATIONS

• Certified Kubernetes Administrator (CKA) — CNCF / Linux Foundation	2025
• Azure Administrator Associate (AZ-104) — Microsoft	2025
• GitHub Foundations — GitHub	2025
• Security, Compliance, and Identity Fundamentals (SC-900) — Microsoft	2024
• Azure Fundamentals (AZ-900) — Microsoft	2024

PROJECTS

MyShell — GitHub Link Unix-style shell implemented in C, supporting pipes, I/O redirection, background process execution, signal handling, and job control. Demonstrates systems programming depth at the OS/kernel interface level, implementing standard Unix shell behaviour from scratch.

LANGUAGES

Greek	Native
English	C2 — Proficient (all components)
German	B1 — Independent (Goethe-Zertifikat B1, 2016)
